Experience:

Amdocs | Software Developer

Dec 2021 – Present | Pune

Metro-X R&D Project (*Node JS, Java, Spring Boot, Microservices, Kafka, Docker, Kubernetes):*

- Metro-X is a tool Amdocs is creating for managing all the environments in a project and making the life of infra team people easy.
- I have worked on this project to create whole middleware from scratch. The middleware layer consists of various Microservices which will act as an intermediate between UI and different data sources.
- I have worked in main research and development from different accounts to develop Microservices according to their needs.
- I have created a testing tool to test all these Microservices in a seamless manner which reduces testing time effort from 1 day to less than 30 min.

Modernizing LESOG Project (*Java, Spring Boot, Azure, C++)*

- LESOG is an order generator made by AT&T for the Southeast region of the USA, which is written in legacy languages. We have modernized this application to Microservices architecture and moved it to Azure Cloud.
- I have worked here on the creation of connecting with different interfaces like CSI, NSDB, SOCS, etc. and rewriting the legacy logic into Java.

Tata Consultancy Services | Assistant System Engineer

Feb-2021 – Dec-2021 | Bengaluru (Remote)

ASOS Retail UK Project (*Java, Spring Boot, Hibernate, Mulesoft, Azure*):

- I have worked as a backend developer in the retail domain for ASOS (UK). Here I have done various enhancements and developed various new modules for their application.

Thinking Machines | Software Developer Intern

Jan-2020 – Apr-2020 | Ujjain (M.P)

Centralized CMI Application (*Java, Spring Boot, Android, Angular*):

In this internship, I have worked on a centralized CMS server and the creation of a Home Automation tool, which is controlled both from the web and mobile application. I have created from scratch a web, mobile application, and a centralized server to manage all devices in the current.

SKILLS:

Programming: Node JS, JavaScript, Java, Python, Hibernate, Spring boot, Shell Scripting, Unix, Microservice Architecture, Design Patterns, Data Structures. Mulesoft

Databases: MySQL, Mongo DB, MS Access, Postgres DB.

Tools: Apache Kafka, UTask, Jenkins, Docker, Kubernetes, Git, Postman, Toad Data Modeler, Tomcat 9, Wamp, Sonar lint, Visual Studio, MS Office.

EDUCATION:

Bachelor of Technology (Information Technology)

Jul-2016 – Jul-2020

Shri Vaishnav Vidyapeeth Vishwavidyalaya – 7.71 CGPA
